# Traditional Indian Knowledge Systems

India inherits rich traditional knowledge systems due to its diverse geographical and climatic conditions. These systems are deeply rooted in the 'COSMIC' or 'Universal Perspective' and are manifested through traditional art, craft and architectural practices. Some of the systems are documented into ancient written texts while some lay scattered as visual texts, rituals and practices. This classical (written) and folk (practiced over years) knowledge never got its rightful representation in the formal architectural education in India as it was formulated under colonial influence.
